PROTECTING THE CROPS OF THE WORLD

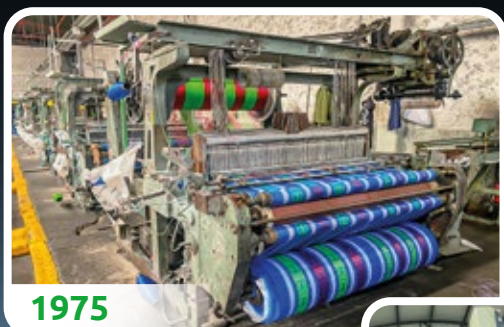

With more than 47 years of experience in the manufacture of plastic mesh, we have continually strived to improve quality and service, so that our customers are 100% satisfied.

Maximum quality at the best price

OUR TEXTILE EVOLUTION IN 47 YEARS

1975

2022

Based in Celaya Guanajuato
Textiles Agrícolas was
established in 1975.

We are a 100% Mexican company
with 47 years of experience
manufacturing woven plastic mesh
and non-woven mesh. Always
inspired by international quality
standards.

Textiles Agrícolas is a leader on
woven plastic mesh manufacture
proved by the loyalty of our
customers that have been growing
day by day.

We are a very competitive
company in this sector, keeping in
mind the importance of the
quality, good service and
environmental care.

FIVE LAYER FILM

10%, 15% & 25% ULTRA

Designed for crop protection. Generating an environment free of dust, drips, resistant to pesticides, UV stabilizer and IR technology that allows optimal control of the microclimate both day and night.

Our plastics are manufactured with state-of-the-art machinery of Italian origin and the best resins on the market.

THRIPS & APHIDS NETS FOR ZENITHAL WINDOW

Meshes specially designed to support the opening movement in zenithal windows. Helps isolate growing areas, containing the entry of tiny organisms such as TRIPS and APHIDS to control the spread of pests inside greenhouses and shade houses, maintaining optimal air circulation.

ANTI-APHIDS NETS

Designed to control the incidence of diseases by being a physical obstacle to virus-carrying microorganisms. Its narrow construction of threads responds according to the different geographical and climatological conditions, to control the spread of pests inside greenhouses and shade houses.

25x25 (pulg2) ó 10x10 (cm2)

ANTI-INSECTS NETS

Solutions for crop protection and plant health by inhibiting the entry of insects such as fleas. The increase of environmental regulations and the restriction in the use of insecticides makes the installation of anti-insect screen mesh an effective and practical resource in areas susceptible to pests.

35% Y 50% RASCHEL SHADE NET

It is used generally as a ceiling in shade houses and greenhouses to block the passage of light and solar radiation for crops that require low shade levels.

Due to its flexibility and lightness it can be placed in a retractable way, allowing the control shadow in the different stages of development of crops or depending on the climatic conditions.

VID PROTECTION

The anti-hail net is the most effective solution against hailstorms. Designed with special characteristics and colors for vine crops. Prevents the burn on the fruit, caused by solar radiation. Its structure allows the passage of air, light and water. Mesh comes with reinforcements in its constitution.

SERVICE

Whit the support of qualified personnel and team own transport to ensure deliveries on time.

QUALITY

We have the most stringent quality standards, backed up with routine tests in our laboratory, which was created 25 years ago by a group of engineers with a phd degree in the field of textile and chemical. Reinvesting in new technologies for measuring and improving year after year and to maximize the quality of our products.

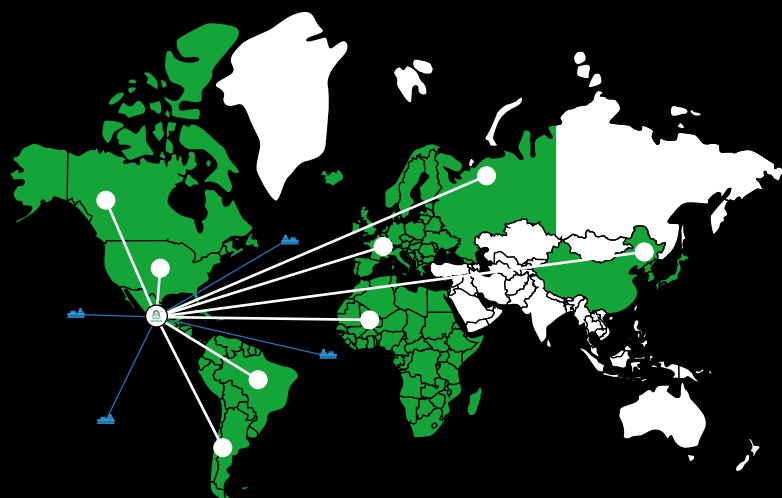

PRICE

Thanks to the high productivity that gives us our machinery and vanguard installations.
